

The Green Grid Member Testimonial

Overview:

[The Green Grid website](#) features a rotating Member Company Feature, highlighting a Member that has demonstrated its dedication to The Green Grid's mission to become the global authority on resource efficient data centers and business computing ecosystems.

Over 7,000 users visit The Green Grid website each month to find out more about what The Green Grid and its members are doing. This feature includes the company's logo on The Green Grid home page and links to a description of the Member company, detailing their activities to improve resource efficiencies in data centers and their engagement with The Green Grid. If you have implemented PUE™ and seen an improvement, found that a white paper has helped in your business activities, learned something from an Academy course, or achieved other values from participating in The Green Grid, we encourage you to share your story with others.

Members are invited to participate in this opportunity to highlight their companies' efforts. Applications for the Members Testimonial are accepted on a continual basis. The current Member Company Feature can be found at:

<http://www.thegreengrid.org/about-the-green-grid/member-features.aspx>.

Guidelines:

Please remember that The Green Grid is a global non-profit consortium of companies dedicated to advancing resource efficiency in data centers and business computing ecosystems. As such, The Green Grid does not endorse any vendor-specific products or solutions. Also, please remember that The Green Grid is a technology-driven organization, not a marketing platform.

- Members are asked to focus their features on improving resource efficiencies in data centers and their engagement with The Green Grid
- Members are asked not to make distinguishing statements suggesting that they are the "leading company", "only company to offer this solution", "largest provider", etc. as all Member companies are working together in The Green Grid and TGG Administration is unable to validate these statements
- Submissions should be written in third-person
- Attach a high-resolution .jpeg or .gif company logo to your email (preferably 200x200 pixels)
- Company feature should be approximately 200 words or less

Company Feature:

Company Name:

Company Contact:

Company Overview:

Please insert your company description and a URL here.

Current Focus:

Please prepare 1-2 paragraphs which address the below questions. If your company has implemented PUE™ and seen an improvement, found that a white paper has helped in your business activities, learned something from an Academy course, or achieved other values from participating in The Green Grid, we want to hear about it!

- How is your company engaged with The Green Grid? (Include your membership level)
- Why is your company involved and what value do you attain from your membership?
- What activities is your company involved in to improve resource efficiency in the data center?

Additional Information:

Is there any other pertinent information which you would like to include?
